

Data Center & Critical Industrial Development

One firm. Every discipline. From finding the right site to opening day.

WHAT WE DO FOR DATA CENTER PROJECTS

01

Site Selection

Finding the right property and confirming it can be built.

02

Campus Planning

Laying out buildings, roads, and room to grow.

03

Site Design & Grading

Shaping the land, building pads, and driveways.

04

Stormwater & Drainage

Managing runoff and protecting nearby waterways.

05

Power Infrastructure

Planning how electric service reaches the site.

06

Water & Utilities

Extending water, sewer, and fiber to the site.

07

Roads & Traffic

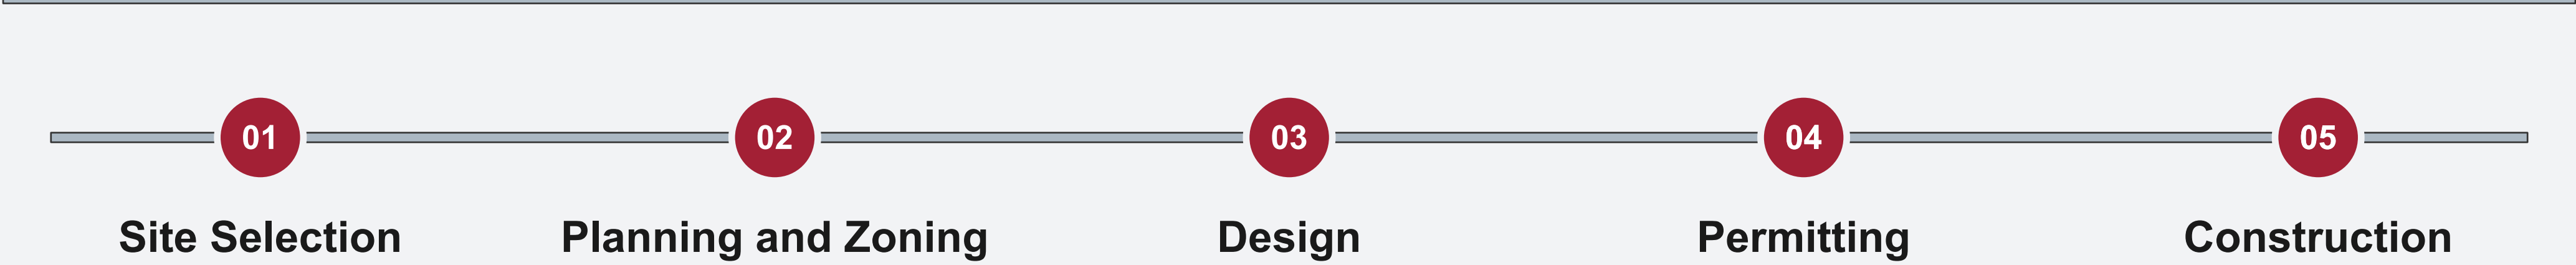

Studying traffic and designing safe site access.

08

Environment & Permits

Protecting natural resources and earning approvals.

HOW A PROJECT COMES TOGETHER

ALSO ON OUR TEAM

Landscape Architecture

Structural Engineering

Land Surveying

Fiber & Communications

Community Engagement

Construction Support

Bringing data centers online, faster.
